

1      **What Is Claimed Is:**

1. A toilet liquid dispenser (10) comprising:

A) an egress pipe (12) extending downwardly positioned with a flush tube (26);

6                      B) a connector pipe (14) sealably connected at a first end to a top distal end of the egress pipe (12), a second end of the egress pipe (12) extends downwardly into a reservoir (18);

C) an inlet pipe (20) is slidably positioned with a bottom opening of the reservoir (18) and sealably connected thereto; and

11                    D) a container (24) having toilet cleaning fluid therein is connected to a bottom distal end of the inlet pipe (20) by a hose (22).

- 1        2.    The toilet liquid dispenser (10) as described in claim 1, wherein the egress pipe  
(12) further comprises an egress pipe fastener (12E) securely attached thereto.
3.    The toilet liquid dispenser (10) as described in claim 1, wherein the egress pipe  
end (12D) is a first egress pipe end (112B) having an approximate forty-five degree  
angle cut.
- 6        4.    The toilet liquid dispenser (10) as described in claim 1, wherein the egress pipe  
end (12D) is a second egress pipe end (212B) having an approximate ninety degree  
bend.
5.    The toilet liquid dispenser (10) as described in claim 1, wherein the reservoir (18)  
further comprises a holder (16) attached to an inside wall thereof, the second end of  
11    the connector pipe (14) is positioned within the holder (16).
6.    The toilet liquid dispenser (10) as described in claim 1, wherein the container  
(24) is a flexible bag.

- 1      7. The toilet liquid dispenser (10) as described in claim 1, wherein the container (24) further comprises a container fastener (24A) securely attached thereto.
8. The toilet liquid dispenser (10) as described in claim 1, wherein the egress pipe (12) comprises an egress pipe bottom (12B) slidably and sealably insertable into an egress pipe bottom (12B).
- 6      9. The toilet liquid dispenser (10) as described in claim 8, wherein the egress pipe (12) further comprises an egress pipe coupling (12C) positioned between the egress pipe bottom (12B) and the egress pipe bottom (12B).
